USGA NEWS: Green Section Research

The American Society of Golf Course Architects, through the USGA Green Section, is sponsoring a three-year study of water sources for turfgrass irrigation. The project is under the direction of Dr. A.E. Dudeck of the University of Florida. Water for non-crop use is now restricted in some states and will become critical in the future. This project is an example of the research projects coordinated or directed by organizations associated with golf to satisfy the future needs of the turfgrass industry.

During the years 1945 and through 1977, the USGA Green Section Research and Education Fund allocated approximately \$650,000 to turfgrass research at 28 universities and agricultural experiment stations throughout the country. Of this amount, approximately \$208,000 was contributed by the National Golf Fund; \$47,300 by the Carolinas Golf Association; and \$33,900 by the New England Golf Association.

Other associations that have contributed generously -- Alabama Golf Association; Alabama Chapter PGA; Anthracite Golf Association; Augusta National Golf Club; Birmingham Golf Association; Central Ohio Golf Course Superintendents Association; Georgia Golf Course Superintendents Association; Miami Valley Golf Course Superintendents Association; Michigan and Border Cities Golf Course Superintendents Association; and Southern Golf Association.
