THE WGCSA DONATES \$4,000 TO TURFGRASS RESEARCH IN WISCONSIN

The membership of the Wisconsin Golf Course Superintendents Association voted unanimously to donate \$4,000 to the Wisconsin Turfgrass Association for 1985. The gift was made at the March membership meeting in Fond du Lac and was accepted by WGCSA member Tom Harrison, President of the Wisconsin Turfgrass Association.

This action moves the WGCSA into its proper role as the major contributor and supporter of turfgrass research at our land grant college in Madison. The generosity of the grant to the WTA sets the stage for what Harrison feels will be a very strong year for the WTA. He also expressed confidence that this donation may inspire other related turf groups in Wisconsin to expand and increase their level of support.

Success in any research program in Wisconsin that works toward the solution of problems we experience in our profession will always be directly related to the level of interest and support we are willing to extend for such programs. We have responded with a loud and clear message that we recognize our rightful role.

Congratulations to all of us!

WGCSA President Monroe S. Miller presents WTA President Tom Harrison a check for \$4,000.
