

State of Wisconsin 1992 Commercial Applicator Training Sessions

The following commercial pesticide applicator training sessions are scheduled for 1992. Training is designed for initial certification or recertification. Sessions begin at 8:30 a.m. and conclude approximately 2:30 p.m.; afterwards 90 minutes are allowed for the examination.

Pest-Control Category	Location	Date	Pre-registration Deadline
Ornamental & Turf (3)	Milwaukee	March 18	March 4
	Arlington	April 1	March 18
	Milwaukee	April 3	March 20
	Eau Claire	April 8	March 25
	Green Bay	April 10	March 27

How to Register

To register for a training session and to receive your training materials, please complete a "Commercial Pesticide Applicator Training" registration card. These cards are available from your county Extension office or from the Pesticide Applicator Training office in Madison. Indicate the location and date of the training session you desire to attend and the pest-control category in which training materials are being requested. Return the registration card and training fee to:

Pesticide Applicator Training—Department of Agronomy
1575 Linden Drive Madison, WI 53706-1597

Please register before the deadline date listed for each training session. Advance registration allows ample time for you to receive and review your training materials prior to the scheduled session, and it may avert cancelling a training session due to inadequate enrollment. We will notify you regarding the status of your session approximately 7-10 days prior to the scheduled date. Directions to the meeting facility will be given at that time.

To become certified in commercial pest-control categories not listed here, review the appropriate training manual and study guide and then make exam arrangements directly with the Wisconsin Department of Agriculture, Trade and Consumer Protection. Their phone number is 608-267-9652.

If you desire more information on registration and obtaining training materials, or if you're unsure which pest-control category certification is needed, please call either:

We Make Your Problems Crystal Clear

Each year, more golf course superintendents realize a simple and energy efficient method of treating problem water quality in their streams and ponds. Otterbine Floating Aerators help prevent algae, aquatic weeds and noxious odors by speeding up the breakdown of wastes.

Through Otterbines' Floating Aerators, up to 3.6 pounds of dissolved oxygen is circulated into 37,500 gallons of water per horsepower hour. With dissolved oxygen, bacteria will break down organic wastes naturally, leaving you clearer and cleaner water.

Otterbine Floating Aerators are self-contained units which range in pumping capacity from 16 to 3,100 gallons per minute. Unit sizes are available in 1/6 to 10 horsepower. Minimum pond size can be as small as 8 feet in diameter and 13 inches deep. These aerators can also beautifully illuminate fountains with low voltage light kits and timing systems.
