

## MEET STEVE SCOVILLE!

We are fortunate to have a new contributor to *THE GRASS ROOTS*. He is Steve Scoville, and he is our new, official cartoonist.

Steve is a graduate of Williams College in Williamstown, Massachusetts. He received his BA degree in both Studio Art and Asian Studies. Now he is attending the University of Wisconsin, working toward a BS degree in Physics-Education and high-school teaching certification. His wife is a graduate student in Biochemistry, also at the UW-Madison.

Steve started golfing last spring, much to the dismay of golf course superintendents everywhere. He hopes that eventually he will be able to shoot below 120, continue to draw for *THE GRASS ROOTS* and stop talking about himself in the third person!

Our cartoonist has spent considerable time visiting with the Editor and with Chad Eberhardt to get a greater familiarity with our business. He's also visited the golf course shop at Blackhawk Country Club in Madison to see first hand part of our "world".

It's the good luck of Blackhawk that Steve works part-time for the club. You'll end up liking this talented young man as much as the club members do. ♣

# The Poly-S™ difference: a unique multiple coating system.

Each Poly-S™ particle is manufactured using a computer-controlled, two-tier coating process that allows nutrients to be released steadily and safely by controlled diffusion through the polymer coating. Thus the rate of release can be regulated over a pre-programmed period of time over a wide variety of

weather conditions — providing higher nitrogen analysis than SCU products with less sensitivity to temperature than fertilizers coated with polymer only.

It is the most efficient — and cost-effective — turf fertilizer technology ever developed. For more information about Poly-S fertilizers and their performance advantages, contact your Scott Tech Rep. Or call 1-800-543-0006.
