

SYMPOSIUM TO GAZE INTO THE FUTURE

By Rod Johnson

The twenty-ninth annual Wisconsin Golf Turf Symposium will be held on Tuesday and Wednesday, November 1 and 2. It will convene at the Hyatt Regency Hotel, 333 Kilbourn Avenue, Milwaukee.

The Symposium committee has selected "Golf 2010" as this year's topic. A review of where we have been in golf course management will precede presentations on where we are going. Of interest to all golf turf managers will be the thorough examina-

tions given to the subjects of "The Products, The Game, and The Job."

A most impressive roster of speakers has been assembled. The keynote address will be given by Jim Latham. John Matheny, senior director of USGA operations, will offer up the view of governing organizations of the future of "The Game".

"The Products" will be extensively examined by Dr. Nick Christians and Dr. Richard Hurley.

"The Job" should prove to be of

interest to all with three top notch golf superintendents offering their insights. Joseph Kosoglov, Jim Gilligan and David Stone will give their Wisconsin colleagues their views on the subject. They will be joined by two well known golf executives—Steve Mona and James Mcloughlin—who will give their special insights and "insides" on where they see our jobs heading.

Mark your calendars now for November 1 and 2. This promises to be another good one! ♣

Flexstake is the most practical accessory to appear on the golf course maintenance market in a decade. The above ground portion is made of color-fast polycarbonate which can be mowed over with reel mowers.

Our **Flexsign, O.B. Markers** and **Yardage Markers** are designed to allow a golf cart or a tractor to ride over them with no damage.

For a free sample of **Flexstake** or a video of our complete **Flexstake** line, call or write.

Scotts® FF-II is your first line defense against winter diseases

In university testing Scotts FF-II has consistently outperformed all other PCNB products. In one convenient application, FF-II controls pink and gray snowmold, cool season brown patch, leaf spot, dollar spot, stripe smut and rust while providing a dormant feeding of 14-3-3 fertilizer for early spring green-up.
