
Milorganite Announces Turfgrass Research Donation Program

Turf managers can help support turfgrass research when they use natural organic Milorganite fertilizer this fall, according to Larry Lennert, manager of research and product development at Milorganite. For each ton purchased and delivered between August 1 and November 30, 1997, Milorganite will donate \$10 to the turf manager's favorite turfgrass research organization.

"Milorganite and its distributors have long supported turfgrass research at the national level through the O.J. Noer Research Foundation," Lennert says. "The Turfgrass Research Donation Program enables Milorganite customers to support turfgrass research at the local level as well."

This is the third year that Milorganite has sponsored its Turfgrass Research Donation Program. In the

first two years of the program, Milorganite donated nearly \$40,000 to turfgrass research organizations across the U.S. and Canada.

For over 70 years, Milorganite has been used on golf courses across North America and around the world. Homeowners also use Milorganite on lawns, trees, shrubs, flowers and vegetables—just about anything grown outside. 🌱
