

# LET IT SNOW!!

By Scott Schaller

As I put together this President's message together, I am looking outside my office, with the window open and I see many golfers playing and enjoying our golf course. Today is the last day of November and the weather is in the high 50s. Unbelievable for this time of year. We have experienced great weather this fall, if not for the entire growing season of 1998. But it has to end sometime and that is why I say, "Let It Snow, Let It Snow!!" I don't think you could find a golfer in the state of Wisconsin that had been cheated of an opportunity to play golf this year due to weather. The 1998 golf season will be a tough one to beat.

The 1998 Symposium Committee should be commended again for their recent efforts in putting together an outstanding educational presentation on

putting Green Establishment, "What You Seed Is What You Get." Also a special **thanks** goes out to Milorganite and Alan Nees, Larry Lennert and their staffs for again putting together one of the finest turf-grass conferences offered in the country.

The winter season is relatively a quiet time on a golf course in Wisconsin, but there is plenty for golf course superintendents to do. This is the time to stay current with our profession and industry through educational offerings. I look forward to seeing you at the WTA's EXPO '99 in Madison on January 12th and 13th, also at the GCSAA Conference and Show in Orlando in early February and lastly the WGCSA Spring Business and Educational Meeting held in Fond du Lac, March 1st. 🌱
