ABOUT THE COVER

Our cover artist Beverly Bergemann captures a casual winter scene to remind us to relax and enjoy the season.

"Sustainability and Climate Change can't be solved like water quality issues with simple shifts. This issue is likely to cut to the core of turfgrass management and require significant adjustments in quality and performance. Also, the ability to be a positive contributor (carbon) can be highlighted but risky".

– Dr. Frank S Rossi, Associate Professor, Department of Horticulture, Cornell University. Dr. Rossi offered this advice regarding change that will affect the golf industry during his discussion on Sustainable Golf Turf Management at the 44th Annual Wisconsin Golf Symposium
