

TREES ON THE MOVE, INC.

"Trees On The Move" would like to introduce you to the best method and most technically advanced tree transplanter available. When planting large trees, the most important thing is — will they live. Our machine's patented design will give you this assurance.

We offer you a complete transplanting and relocation service with three different size tree transplanting machines to match your needs. "Trees On The Move" has the largest machine in the State of Wisconsin, which will dig and move 88 inch diameter rootball weighing up to 9,500 pounds.

FALL SPECIALS

Nursery grown, 4 to 5 inches in diameter, deciduous trees.

Flowering Crabs, Maples, Ash, Locust and Birch are available.

These trees would be planted with a 60 inch diameter, 3800 lbs. rootball Big John Tree Transplanter, which adds up to 75% rootball weight than the average nursery balled tree, and 25% more than a TS-66 Vermeer. Quantities are limited — so call now for best selection.

When you're done all you add is WATER!
