

# The Very Thing That Keeps Your Grass Alive Will Kill Most Cars.

Only Club Car features an all-aluminum frame and chassis. Not only is it totally rustproof, it's also three times stronger

than the frame of its nearest competitor. And over 100 pounds per car lighter. So rather than getting

killed with corrosion damage and repair problems, invest in the car that's built to protect itself. Club Car. Anything else,

and you're all wet. Call your authorized Club Car representative for more information.
