# Snow Buries April Meeting

By Andy Kronwall

---

On April 15 Naga-waukee Golf Club superintendent Charlie Shaw awoke to find his golf course buried under 3 inches of snow. Charlie had been expecting to play host to 60 golf course superintendents and purveyors from around the state that day. With an 8:00 a.m. shotgun planned, decisions had to be made quickly; this one was the easiest he'll make this season. The obvious conclusion, **CANCEL**, just like he would for any other group chomping at the bit to get that first round of golf in.

With a few phone calls to other board members the list was divided and the phone lines were buzzing; by 6:30 a.m. the deed was done. All but a half dozen registrants had been contacted and the first round of the year was just an illusion.

The outing fee was carried over to the May meeting. Our guest speaker Mr. Phil Pellitteri, UW-Madison Department of Entomology, was

rescheduled for the May 20th meeting, sharing the spotlight with Dr. Doug Maxwell, UW-Madison Department of Plant Pathology. ♣

## NATURAL ATHLETIC TURF INC. GOLF COURSE CONSTRUCTION & IMPROVEMENTS

*Specializing in Greens - Tees - Bunkers - Fairway  
Construction - Feature Shaping - Drainage Systems*

By Contract or "T & M" basis. Also Astro turf Top Dressing drag mats

ROY G. ZEHREN • 11040 N. Buntrock Ave.,  
Mequon, Wisconsin 53092 • (414) 242-5740

## MILORGANITE WILL SPONSOR TURFGRASS RESEARCH DONATION PROGRAM FOR SECOND YEAR

The success of last year's Turfgrass Research Donation Program has inspired Milorganite Division of MMSD to offer it again this year. For each ton of Milorganite purchased and delivered between August 1st and November 30, 1996, they will donate \$10 to your favorite turfgrass research organization. Wisconsin favorites are most often the Wisconsin Turfgrass Association and the O.J. Noer Research Foundation.

Last year, because of this program, Milorganite donated more than \$17,000 to turfgrass research organizations across the U.S. and Canada. ♣
