

Use Greensmix.TM And Breathe A Little Easier.

It's easy to tell which golf courses use **Greensmix**.TM No rotten eggs. That's because GreensmixTM has less fines than any other rootzone material. Fines mean poor drainage, plugged up greens, and black layers through the greens that give off the aromatic scent of rotten eggs. GreensmixTM has less fines in the sand than any other rootzone material...and we test every load to guarantee consistency.

Use GreensmixTM and breathe a little easier.
