

Focus ^{is} on Performance

Multi-Use

Focus creeping bentgrass has been bred for versatility and can be used for tees, greens and fairways. It's adaptable and recommended for areas wherever creeping bentgrass is currently in use. Focus has excellent *Poa annua* resistance as well as fast recovery from aerification.

Quick Germination

It is quick germinating, even in cooler soil temperatures. Focus has active growth during cool temperatures to better compete with *Poa*.

Disease Resistance

Focus has excellent resistance to dollar spot, pink snow mold and other diseases.

Heat Tolerant

It has outstanding summer stress tolerance and will handle the lowest cutting heights, even in the hottest days of summer.

Winter Hardy

Focus performs with great success in colder northern areas of the U.S. and well into Canada.

Available from Reinders, Focus creeping bentgrass is a release from Dr. Leah Brilman, Director of Turf Research & Technical Services, SRO Seed/Pickseed.
