## NOTES

AUGUST 1962

THE EXECUTIVE BOARD MET on July 23 and recommended the following to the regular membership:

Jack Greengo be reinstated as an apprentice member; also that Henry Bohks whose records have been misplaced be reinstated as a life member.

The following apprentice members were accepted:

James Lindblad, Assistant at Executive Club, Chanhassen, Minnesota  
Clarence E. Larson, Superintendent of Theodore Wirth Par 3 Golf Course, Minneapolis.  
Russel Adams, Superintendent, University of Minnesota Golf Course, St. Paul, Minnesota.  
Bernard E. Zimmer, Superintendent, Greenhaven Golf Course, Anoka, Minnesota.

The following Associate members were accepted:

Raymond E. Grover, Archer Daniel Midland Co., a chemist assigned to Fertilizer Utilization.  
Lorne R. Dunham, Chem Agro Corporation

OLD TIMER Harold Stodola writes:

"My new address is Tucson Country Club, P.O. Box 6427, Tucson, Arizona. It is an oasis in the desert - river bottom, black soil, rolling terrain and many varieties of trees. Best wishes to all the fellows."

Ed. Note: Mr. Stodola, keep the coffee pot brewing in late January while on our way to San Diego and the national meetings!

SPEAKER - James Latham, formerly of the USGA Green Section and now with Milorganite, will be the featured speaker for the Mankato Meeting, August 14, 1962. It is hoped that as many out state superintendents as possible will attend this meeting at Mankato Country Club, Mankato, Minnesota.

MIRACLE DRUG - It prevents overweight, a guilty conscience, alcoholism, and bags under the eyes. Its name is "Sulfa-denial".

RECIPROCAL PLUG - Wally Adams and Seldon-Watts Co. are responsible for corrected addressograph plates in the Association mailings.

YOUNG MAN wanted for job in Bismark, North Dakota. Contact P.R. Dept.

SCIENTIFIC BREAKTHROUGH - There are two approaches being used in the manufacture of complete fertilizers for use on putting greens. Sacco Company has a high analysis completely soluble fertilizer which is applied dry and then watered in and will not be picked up by the greens mower. ADM has a high analysis prilled and coated material sieved through a fine mesh screen which can be applied with a cyclone spreader, need not be watered in, and designed to resist being picked up by greens mowers.

LEAVE THE DRIVING TO US - A bus for the Mankato meeting will leave the Edina Village Hall parking lot (at 50th St. and Hwy. 169) at 10 A.M. on Aug. 14. Anyone desiring to ride may do so. Parking of cars in the Village lot will be cleared by Joe Rush, volunteer fireman for the Village of Edina. Art Thorud, veteran bus rider, will serve as bus boy. It will be interesting to see how many superintendents have chosen reliable crews to carry on in their absence!

A COMMENTARY ON THE TIMES - The noun "honesty" is now preceded by "old fashioned".
