

# Minnesota Golf Course Superintendents Association

Affiliated with the National Golf Course Superintendents' Association

## HOLE

## NOTES

NEXT MEETING will be at Greenhaven Golf Club, Anoka, Minnesota. Date is August 5, 1963. Greenhaven is at the northern city limits of Anoka just off U.S. Hwy. 10.

BULLETIN - The University of Minnesota Extension Service edits a monthly paper called "Soil Fertility Notes". It is available to anyone who might be interested by contacting Soils Extension Specialists, Institute of Agriculture, University of Minnesota, St. Paul 1, Minnesota.

To quote from this bulletin: "Sharpen your pencil carefully when you're approached with the idea of fertilizing field crops through "leaf feeding" with small amounts of mixed or complete liquid fertilizers.

"It isn't that liquid fertilizers are less effective; abundant research has proved them equal in every respect to dry fertilizers when they're applied to the soil in the same manner as and at equal rates of actual plant nutrients. On field crops, the "leaf feeding" idea breaks down mainly because the recommended rates of application don't begin to measure up to the crop needs.

"In many cases you will find the costs to be several times that of equal amounts of plant food bought in conventional liquid or dry form."

DUTCH ELM DISEASE - 19 cases of Dutch Elm disease have been reported in the Twin City area thus far.

FOR SALE: One set of clubs by woman too old for goofing -- Call Merv Klatte.

MEMBERSHIP APPLICATIONS have been received from the following persons:

Tom Wasgatt, Asst. Supt. at Orono G.C.

Duane Webster, Supt. of Owatonna Municipal G.C.

Howard Kaerwer, Jr., Research-Service Dept. Northrup King & Co.

NOTE -- For selfish reasons the editor of "Hole Notes" would like everyone to read the articles on pages 52 and 68 of the June issue of Golfdom.

JOB OPENING -- 9 hole par 3, far south side of Minneapolis. Salary is open, although bidding will probably start at \$5500.00. Contact Milt Wiley for further details.

SHADE TREE CONFERENCE -- The annual Shade Tree Maintenance Short Course will be held at the U. of Minn. on Monday and Tuesday, Sept. 16 and 17. Golf Course Superintendents can well afford to learn the latest in silvicultural practices.

SUPERINTENDENTS who are plagued with an over-abundance of golf car traffic might well view with retrospect the pattern of golf car use. It appears, at Minikahda at least, that most members view the car as a crutch for the aged and the infirmed and are reluctant as well as apologetic about using it. However, human nature being what it is, anytime something is jammed into their hands, the reaction is to accept. The mistake then is to put the incentive of monetary gain in the hands of personnel around the first tee. Investigate the mysteries of car rental at your club and see if this might be a factor in increased golf car traffic. Admittedly the golf car is here to stay, but a change of this type could materially reduce the number of rounds and still not affect the individuals who need cars for health reasons.

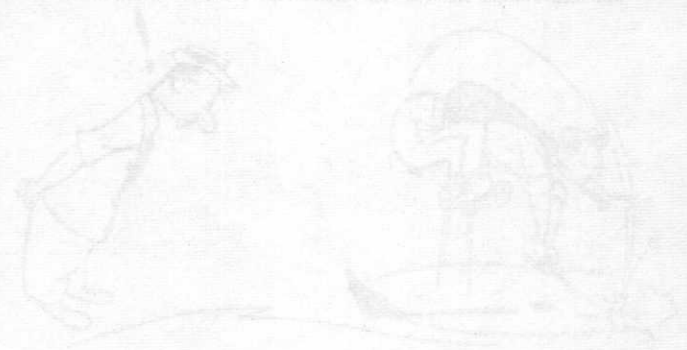

FINAL -- GREENHAVEN -- ANOKA -- AUGUST 5. Tee off time 1:15 - 1:45. Dinner at 7:00. Reservation by return post card would be most appreciated.

LAST MEETING at Hazeltine held with mixed emotions. Those who observed the progress already accomplished said it was tremendous. Those who played thru the 17th hole were blasphemous in their comments. Those who projected the problems of the future shock their heads in disbelief. Everyone agreed that the efforts of John Wiley, Milt Wiley and Bill Fischer should not go uncomplimented.

NOTES

NOTE

NEXT MEETING will be at Greenview Golf Club, Kansas, Missouri, August 10, 1900. Resolutions for the coming year will be discussed.

THE UNIVERSITY of Minnesota, Department of Agriculture, has published a paper on "The Golf Course" which is available to members of the Association.

A paper from the University of Minnesota, Department of Agriculture, has been published which is available to members of the Association. It is a paper on "The Golf Course" and is a very interesting and valuable paper.
