

Disease-Fertility Demonstration Plots

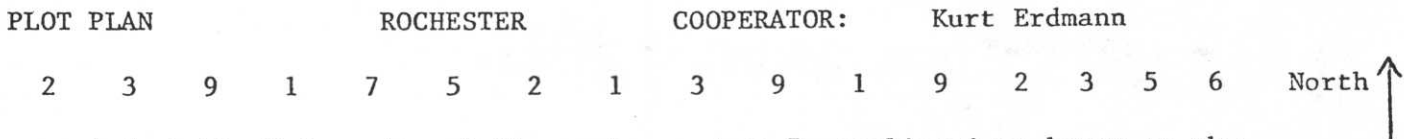

Summer plot work is continuing at Duluth, Rochester, Campus, and Oak Ridge. The snow mold damage is recovering, slowly at Northland and somewhat faster at Rochester Country Club. The 1979 season fertility applications began on June 4th at Oak Ridge. This plot is located on fairway #11. Treatments measure 6' x 40' and are replicated 4 times.

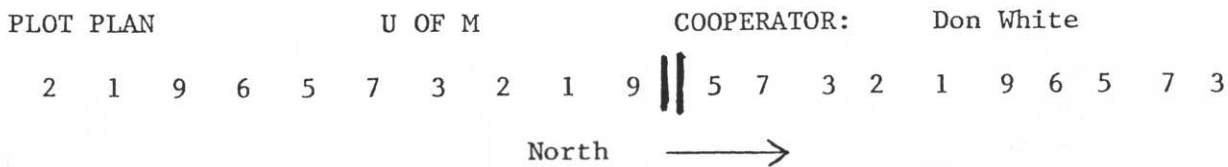

At Northland Country Club on June 5 applications began at the green nursery. Treatments measure 9' x 70' and are replicated twice.

At Rochester Country Club on June 7, applications began at the green nursery. Treatments measure 6' x 60' and are replicated three times.

And at the University of Minnesota on June 7, applications began at the turf research area. Treatments measure 6' x 68' and are replicated three times.

The product #'s are 1) Par Ex 31-0-0, 2) Par Ex 20-0-16, 3) Scotts 22-0-16 4) Scotts 20-3-3 plus iron, 5) Ammonium nitrate 34-0-0, 6) Check, 7) Ammonium sulfate 24-0-0, 8) Howes Special 20-5-10 plus iron, 9) Milorganite 6-2-0 10) Urea 46-0-0.
