

NECROLOGY

Paul Miller who joined the M.G.C.S.A. in 1937 died last month at the age of eighty. He spent the majority of his working life with R. L. Gould. In 1930 R. L. Gould was a produce company, buying and selling vegetables. They needed a truck mechanic for the chain driven hard rubber tire trucks. Paul was hired and eventually became a truck driver and then a dispatcher. At that time the company changed from produce sales to seed and garden supplies. Paul went into sales which led him to be the sales manager of the Power Equipment Department. His territory, while in sales, was Minnesota, North and South Dakota and Western Wisconsin. Pretty large for one man, especially with the all encompassing job of the salesman in that day and age! when R. L. Gould died nine employees bought the company and Paul was elected vice-president and director, a position he held until he died. He retired officially in June of 1978 and at that time there were three generations of Millers - Paul, Gordy and Dan Miller with the R. L. Gould Co. He was always an active booster of our association, effectively recruiting new members in his travels throughout our area. He will be greatly missed by all.

NEW CUSHMAN GREENSAVER AERATOR

The accurate aerator that gets aeration done 10 times faster than most other methods

In the raised position you're able to travel quickly between greens...and that saves time. When you reach the green just move the hydraulic lever at your side until the Greensaver is lowered into the turf. There's no need to stop the vehicle. You can keep moving and aerate at speeds up to 6 mph.

Cores are pushed into the rotating drum as the Greensaver penetrates the ground.

Cushman® Turf Care System cuts equipment costs 35%, labor costs 50%.

Purchase one of the basic Cushman Turf-Truckster vehicles available in 3 or 4 wheel models with 12 or 18 hp. Then add as many of the new modular accessories as you need for the work you have to be done. No need to buy another expensive vehicle. In minutes you can attach the module you need by using simple pins that slide in and out. No need for tools.

TOP DRESSING
Mounts on Truckster chassis.
No need for separate engine.

SPIKING
Spike 18 greens
in 2 1/2 hours.

DUMPING/HAULING
1000 lb. payloads.
Manual and hydraulic dumping.

SPREADING
Spread up to 40' swath.

SPRAYING
Precise spraying rates
