

MEET YOUR ASSOCIATE MEMBERS!

DON HERFORT has been a member of M.G.C.S.A. since January of 1965. It was at that time he decided to devote his full time to his new love, golf course architecture. Prior to that time, Don had worked for sixteen years for the 3M Company as an accountant and manager of the recreational area. In 1963 he designed Tartan Park Golf Club for 3M and since that time has created 32 full golf courses as well as undertaking over 50 improvement and reconstruction projects. Don sees the building of shorter courses with more of a premium on accuracy as a coming trend in golf course design. He also sees natural landscape being employed more by the golf course architect which would help eliminate unnecessary maintenance of large areas and would help the superintendent cut maintenance costs. Don and his wife, Shirley, have four grown children.

JOHN SNIKER is one of those members who make M.G.C.S.A. an outstanding organization. Though never brash nor outspoken, John is always there when you need a helping hand or a new idea. Even though his position in the Sales Department of the Cushman Motor Company calls for a substantial amount of travel, John squeezes some time from that hectic schedule to actively attend almost all of M.G.C.S.A.'s functions. He truly enjoys meeting with all the superintendents and is proud to be a part of such a professional association. Before joining the Cushman Motor Company staff, John was employed for seven years by Reed's Sales and Service. A native Twin Citian, John and his wife, Carole, have four children ranging in age from ten to twenty. When time permits, the Sniker family's favorite hours are spent at their lake cabin near Pine City.
