## Responsibilities and Rewards of the Executive Committee

Serving on the Executive Committee means attending a monthly board meeting which usually lasts two to four hours depending on the amount of business to be considered. Ideas and suggestions from association members are discussed and the board makes decisions on what they feel is best for the association.

Being a board member usually means chairing a committee. The president selects committee chairmen from among board members and in turn they select their own committees and follow through on decisions made at board meetings. This can take a lot of a superintendent's time, especially when it involves the Annual

Conference.

The rewards are not monetary but rather in the friendships one makes and in the respect you gain for your fellow superintendents. Board members are hard working and dedicated beyond what many people realize.

Also working with Warren Rebholz, Tom Magne and Anita Hight of the M.G.A. office is truly a pleasure for these people are very helpful and knowledgeable and play a large part in the success of the association.

I believe each eligible member should pursue serving on the board for it can be quite enjoyable. A good way to get involved is by volunteering to serve on one of the committees. It will be appreciated by the board and may start you off on a rewarding experience.
