

# FUTURE GCSAA CONVENTION SITES

<u>YEAR</u>	<u>HOST CITY</u>	<u>EXHIBIT HALL</u>
1982	New Orleans	The Rivergate
1983	Atlanta	Georgia World Congress Center
1984	Las Vegas	Las Vegas Convention Center
1985	San Francisco	George Moscone Convention Center

San Francisco's soon to be completed George R. Moscone Convention Center will be the site of the Golf Course Superintendents' Association of America's 56th International Turfgrass Conference and Show January 30 - February 5, 1985, G.C.S.A.A. President Michael R. Bavier, CGCS, announced today.

"Besides its excellent convention facilities, San Francisco offers a wide variety of activities for the entire family. We're confident that San Francisco will be one of our most popular conference destinations", Bavier said.

Since its beginning in 1927, G.C.S.A.A.'s Turfgrass Trade Show has grown so large that relatively few convention centers in the U.S. can house its more than 200 annual exhibitors, Bavier noted. The Moscone Convention Center, scheduled for completion this fall, is the largest column-free exhibit hall in the United States, with 275,000 square feet of unobstructed exhibit space. It is unique in that its main facilities, including the exhibit hall and the 30,000 square foot ballroom, are 30 feet underground.

The San Francisco conference schedule also includes a golf tournament, seminars, education sessions and the association's annual membership meeting. It will mark the association's first return to the West Coast since its 1981 conference in Anaheim, which had a record week's attendance of 17,946.

## Fast, efficient maintenance and repair of well pumps.

Bergerson-Caswell is well equipped, not only for well drilling, but maintenance, too. If you have a reduced flow from an aging pump, or if you are starting to pump sand or other foreign materials, call us for an analysis of repairs. We can put new life into existing wells, quickly and economically.

**Call (612) 479-3121**

**Bergerson-Caswell, Inc.**

5115 Industrial Street • Maple Plain, MN 55359

Well pumps are quickly and easily pulled for inspection and repair by 10T Smeal Hydraulic Pulling Rigs—among the many special units in the Bergerson-Caswell fleet operating in the Upper Midwest.
