Robert Hefta, Rhone-Poulenc, Inc.
Tom Bruggeman, Irrigation Supply, Inc.
Louis King, Irrigation Supply, Inc.
Mark Swanson, Irrigation Supply, Inc.
David Orton, Hanson Block Co.
Mickey Lovett, Ciba-Geigy Corp.

We have survived almost another season. The fall season is upon us and hopefully we aren't to battered and bruised to get our winter preparations under way. The list of things to do is endless but I'm sure a lot of golf courses are going to be looking at more secure water sources and irrigation system updates.

I have been very lucky this season and haven't had a major breakdown since April. This season has shown my Board of Directors the importance of an efficient and full coverage irrigation system so this fall we're adding more sprinklers in the rough and replacing some old piping. I can't say I'm happy about the drought, but it has given me an opportunity to demonstrate some of our weak areas on the golf course.

A great day was had by all those that attended the tournament and appreciation for Kurt Erdmann at Rochester

Golf and Country Club. I wasn't able to attend myself but I did receive a nice note of thanks from Kurt which is printed elsewhere in HOLE NOTES. A bigger thanks has to go to Kurt for the professionalism and kindness he has contributed to our trade. Thanks also should go to Rochester Golf and Country Club for allowing us the use of their fine facility.

The September 19 meeting is at St. Cloud Country Club where our annual Harold Stodola Research Scramble will take place. From what I understand some awesome teams are being put together so practice your shots and be prepared for an exciting day and evening at Kerry Glader's course.

Do you suppose people will be overseeding their roughs with the most water efficient turf varieties this fall. I wonder if the money saved on fungicides made up for irrigation pumps running 24 hours a day.

CALDWELL NOW A CGCS

Dale H. Caldwell has successfully completed the requirements of the GCSAA Certification Program. Dale has earned the right to use the title, Certified Golf Course Superintendent (CGCS) and all the privileges and honors associated with this title.

To earn the title of Certified Golf Course Superintendent,

the applicants must have their golf courses reviewed by two currently certified golf course superintendents. Applicants must also prove academic capabilities by passing a comprehensive six-hour written examination covering every facet of the profession.

Attaining certified status is no minor accomplishment. Successful completion of the certification process indicates an individual's willingness to be judged by the standards of fellow professionals and assume a position of leadership in the game of golf.

Dale's attainment of certified status demonstrates both desire for personal advancement and also a commitment to provide Minneapolis Golf Club with the highest level of golf course management expertise available.

NOTICE OF RECALL

Notice from the manufacturer/formulator of Teremec SP (chloroneb):

"In view of the recent phytotoxicity problem which has developed with some of the chloroneb fungicide that was formulated by Drexel, we recommend that you advise all your customers and (end users), to not use or sell this product until the full scope of this situation can be determined. We will keep you advised."

As a precaution, recall of all TEREMEC SP (chloroneb) is

THEY HOLD DOWN MORE THAN ONE JOB.

Kubota's mid-sized tractors are very versatile. You'll find them at work on farms, in parks, nurseries, estate homes and even on construction sites.

The reason is simple. Our L-Series tractors come with features you'd expect to find only on bigger, heavier machines. For example, 3-, 4-, or 5-cylinder diesel engines with PTO horsepower from 21 to 40.

Other features you can select include 8x7 or 8x8 mechanical or hydraulic shuttle-shift. A choice of 2- or 4-wheel drive on most models. A hefty 3-point hitch. And more.

So if you're looking for a tractor that can get the job done, whatever it is, you've found it. The Kubota L-Series.
