# Now, Scotts offers effective Poa control and high potassium feeding in one product

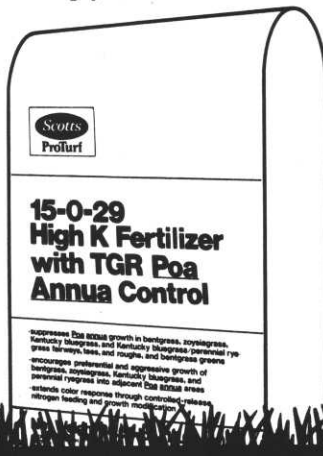

Gain the programming flexibility you're looking for with ProTurf® High K™ Fertilizer with TGR® Poa Annuua Control.\* Not only does it weaken the competitive *Poa*, but it also allows you to choose to add a high potassium feeding to your fertilization schedule to help your turf.

Ask your ProTurf  
Tech Rep for details.

Chemically dependent, drunk, drug addict, problem drinker or alcoholic -- don't give up. The MGCSA is behind you 100%.

At the 1989 Annual Conference, I informed the association that I, a recovering person myself, would like to help anyone that has, or may possibly be developing a drug or alcohol problem. My intention was that anyone, even someone with thoughts that they may have a problem, could call me and I would visit them as quickly as I could. I realize our membership covers a large area, but my intention was to do the best job I could to contact those who wanted to talk.

Following the conference, other MGCSA members, also recovering, informed me that they, too, would like to help. We now have a network that is fairly well spaced throughout the state with the exception of the Arrow Head area.

The names of those willing to help me will not be printed here. If you call me I can give you a contact person in your area.

If your preference is to remain anonymous with just me, and you just want to talk, that's fine. I have a state directory of agencies that do chemical evaluations; there will be no charge to you or to the Association.

I repeat -- the MGCSA is 100% behind this program. No names will be printed or given out, but I will periodically update the association on "numbers."

I respect your trust in me -- and I will respect your confidentiality.
