BETTER TURF CARE FROM THE GROUND UP

The Importance of Protective Clothing

Did you know that the most frequent way people are injured or poisoned by pesticides is through contact with their skin? Spilling a little pesticide onto your skin may result in a burn or rash, and many pesticides may not appear to injure your skin at all. However, most pesticides can be absorbed into your body through your skin. Once absorbed, the pesticide can be quickly picked up into your blood. The blood then transports the pesticide to other parts of your body.

Pesticide labels tell you what type of protective clothing is required. However, make sure the protective clothing and gloves you use are clean. If they have any pesticide residues on them, and you put them next to your skin, you will probably absorb some of that residue into your body.

Using pesticides safely means protecting yourself as well as the people and the environment around you. Pesticides that get into your body can make you sick, sometimes very sick. Protect your health by always wearing the protective clothing.

Halon Ban Spurs Search For Alternatives

An international treaty will halt production of halon, a popular fire-fighting agent, by the year 2000. Halon is closely related to chlorofluorocarbons, which have been linked to ozone depletion.

Chemical companies are rushing to develop halon alternatives before the ban takes effect. Superintendents considering halon systems for their pesticide storage buildings or other club facilities should stay aware of existing alternatives.

AERATION TIME IS UPON US — TRY COREMASTER ON YOUR TRACTOR FOR ALL YOUR TURF AERATION NEEDS

SPECIFICATIONS

CORING SWATHE 49" (1240 mm approx.)

CORING DEPTH 0—3¾ (95mm approx.)

DIMENSIONS OVERALL

Height 21" (530mm approx.)

Width 55" (1400mm approx.)

Depth 21" (530mm approx.)

WEIGHT 900 lbs. (400kg approx.)

TRACTOR SIZE

15—60 H.P. with standard 3 point linkage and category 1 P.T.O. drive shaft.

TINE SIZES

Quadra 1/4", 3/8", 1/2" and 5/8", (6mm, 10mm, 13mm and 16mm)

OPERATING SPEED

Variable up to 30,000 sq. ft. per hr. (2,800m²) subject to pattern selected.

AERATION PATTERNS

Variable 1", 2" and 4" centers laterally—1" to 5" centers longitudinally. (25, 50, & 100mm centers laterally X 25 & 125mm centers longitudinally)
