

In Brief . . .

• **Water Fact:** Approximately 42 percent of household water is used for landscaping, and landscapes are typically overwatered by 20 to 40 percent. All outdoor landscaping in California, for instance, accounts for 2.5 percent of the state's water use.

• **Traces of herbicides were found in rainwater samples from 23 states in a study recently completed by the U.S. Geological Survey.** The herbicides detected included atrazine, alachlor, metalachlor and a degradation product of atrazine. The main source of the herbicide pollution is believed to be agricultural pesticide use.

This is the first major study to confirm that pesticides can be transported through vaporization into the atmosphere. Although turf applications were not believed to have contributed to the pesticides found in the rainwater samples, superintendents should be prepared to answer questions from concerned citizens and members.

MEMBERSHIP REPORT

NEW MEMBERS—AUGUST 22, 1991

Daniel Augdahl	Interlachen Country Club	Class	D
Allen Jaques	Dellwood Hills Golf Club		C
Jeffrey Johnson	Midland Hills Country Club		D
Dan Levendowski	Anoka Technical College		E
Janelle Lord	Rochester Golf & C.C.		D
Mike Pierce	Coffee Mill Golf & C.C.		B
Robert Sill	Coffee Mill Golf & C.C.		B
Eric Peterson	Town and Country Club		C
Richard Skluzacek	Kasco Marine, Inc.		F

RECLASSIFICATION—AUGUST 22, 1991

James Gardner	Rochester Golf & C.C.	B to A
Kelly Johnson	River Oaks Golf Course	F to B
Jack Krech	Watsonwan Country Club	BII to B
Chris Leach	Oxbow Country Club	C to BII
Eric Rosenberg	Lidgerwood Golf Club	C to BII
David Solga	Golden Valley Country Club	BII to C

The Ex Stands For Excellence

Why the EX STANDS FOR EXCELLENCE in professional turf care.

- Par Ex is the only professional fertilizer line containing IBDU, undisputedly the finest slow release Nitrogen source in the world.
- IBDU gives you the highest level of WIN, or Water Insoluble Nitrogen.
- IBDU delivers all of its Nitrogen in a single growing season.
- The Nitrogen release rate of IBDU is generally affected by only two factors: soil moisture and granule size.
- Slower release makes Par Ex products perfect for your Fall Fertilization program.
- Fewer applications are required, labor costs are cut.
- The salt index of IBDU is the lowest of all commonly used fertilizer materials.
- IBDU fights nitrate pollution because very little Nitrogen is lost through leaching or volatilization.
- Choose from over 60 different product formulations.
