## Pesticide Reporting Proposal Sent to Reilly

A proposed rule designed to clarify manufacturers reporting requirements on the potential adverse effects of pesticide products has been sent to EPA Administrator William Reilly for final approval.

The proposed regulation would codify the continuing duties that pesticide registrants have under FIFRA to report information about possible unreasonable adverse effects of their products.

The proposed FIFRA rule has cleared the White House Office of Management and Budget routine review.

However, the rule still needs to gain an exemption by OMB from the regulatory moratorium, agency officials say.

President Bush announced a 90-day moratorium in January. He extended it in late April for 120 days and announced in late August that he would extend it for a year.

OMB has informed EPA that the rule is exempt from the moratorium, although OMB has not made public its reasons for exempting the rule.
