

MGCSA's Swing of the Month

1

Butch Greeninger begins his backswing with such speed that the clubhead is nearly invisible.

2

Weighted right foot is causing severe compaction while left toe is creating a "smear" divot.

3

A slight pause at the top of the swing while Butch decides which sod cutter he should represent.

4

With the decision made and eyes closed, full body weight is shifted and the end result? Ask Butch.
