

Enviromation

(Continued from Page 17)

questions concerning this program, please give me a call.

NOTICE: The annual spring MDA recertification for licensed pesticide applicators workshop will be held in conjunction with the MGCSA Annual Conference in December.

In closing, our industry must continue to support quality and quantifiable research at all levels to help assess occupational health and safety awareness, to reinforce golf courses as environmental assets, and to continue to find better alternatives to golf course maintenance and manage-

ment through environmental stewardship. In coining an EPA term, we must continue to make "Benefit Assessments" on our golf courses for the good of our employees, golfers and the game of golf.

GOLF COURSES = ENVIRONMENTAL ASSETS!
