

Plaisted Companies Named Supplier For Best Sand

Best Sand Corporation, Chardon, Ohio, has named Plaisted Companies, Inc., of Elk River, as a new distributor of its golf course bunker sand. Plaisted will be distributing the white sand throughout Minnesota and western Wisconsin and delivering directly from a stockpile at the company's terminal.

Plaisted is a major supplier of bulk maintenance and construction materials such as greensmix, topdressing materials, cart path aggregates, coarse gravel and drain tile rock to the golf course market. The new sand is a welcome addition to the product line because it is the only white bunker material the company offers.

Best Sand offers its distributors and customers material that is consistent from one shipment to the next because it is all mined from the same company-owned quarries in Ohio. The sand is then shipped to terminals near Minneapolis, Cincinnati, Louisville, St. Louis, Detroit, Chicago and Hamilton, Ontario for distribution. Best Sand is a subsidiary of Fairmount Minerals, Chardon, the third largest producer of industrial silica sand in the United States and the largest U.S.-owned producer.

mental regulation and its relation to sound public-access development.

Show hours are Friday, November 11 and Saturday, November 12 from 10:00 a.m.—5:00 p.m. at the Orange County Convention Center on International Drive in Orlando, Fla. For more information contact: *Golf Course News*, Conference Group, P.O. Box 997, 38 Lafayette St., Yarmouth, ME 04096; the Golf Course Expo hotline at 207-846-0600, ext. 248; or fax 207-846-0657.

Tine after tine

does it best.

Yes, for years, Aer-Way's Shattertine aerifier has been keeping sportsfields and golf courses healthier and greener.

Now we offer **two new options**—the replaceable, **Bolt-on Shattertine** and the **NEW bolt-on Finetina**.

You can continue aeration right through the playing season. Yes, even on greens and tees. Eliminate compaction and surface water and stimulate root growth. Let your grass plants breathe, without restricting play.

Ask your nearest Aer-Way dealer for a demonstration of the new bolt-on options — Shattertine or Finetina. You'll love them.

Your Sustained Efforts Now Will Pay Off In The Spring

Late season fertilization with Sustane® helps you maintain turf density and color throughout the fall, builds your nutrient reserves, and provides for early spring green-up. With Sustane, you also get potash to increase cold tolerance and harden plant tissues before dormancy and create stronger, denser turfs with year round resistance to drought.

Sustane Fertilizers/Soil Builders are microbially active fertilizers which, when applied in the late fall, aid in the suppression of winter diseases while increasing the live biomass of the soil. They give your turf a precise blend of soluble nitrogen, WIN, and other essential nutrients for quick release and long term feeding in the spring.

For more information about any of the Sustane products or the late season feed program, call your local distributor or Sustane at 1-800-383-4081.
