

## Ice Alert—

(Continued from Page 9)

ice" is exposed to sunlight, it would probably be prudent to break up the ice or melt through it to create avenues for air exchange.

\*Remember, the soil thaws from the top down and from deep in the soil up toward the surface. The most crucial time is when there is a residual zone of frost between 4" and 8" below the soil surface. This usually results in the top few inches above the frost layer being saturated and can result in problems unless the water has run off before the soil surface thaws.

Please do not hesitate to call either Brad Pedersen at 624-7407 or 507-835-3620, or Don White at 624-9206 or Troy Carson at 624-4907 if you think we can help.

Best wishes for a good year and please keep us posted as to how things go.

## Spring Bull Session

The Spring Bull Session, usually taking place at Alexandria Golf Club, will be held this spring at Detroit C.C. in Detroit Lakes on Monday, March 18.

An informal meeting will start at 9 a.m. and run until 2 p.m. Coffee and doughnuts available with lunch on your own. Come with questions and be ready for a good "round table" discussion.

All superintendents are invited. Contact Brad Klein at 218-847-8070 for more information.
