

EDITOR'S CORNER

By Rob Panuska
Waseca Lakeside Club

Are we having fun yet??? With summer in high gear the demands of our positions as superintendents, assistants and grounds workers increase almost overnight. The challenges we face each day can overwhelm us if we don't take time to regenerate and get a fresh perspective. On Monday, June 16 many of us did just that at Cannon Golf Club in Cannon Falls. Host superintendent Jeff Backstrom and his crew had the course in outstanding condition. GREAT JOB, JEFF!!! Marty Terveer from Hidden Creek, Rick Lucken from Benson and I had the dubious honor of golfing with Steve (I can make this putt) Garske from Par Aide. Be sure to look for more from our first golf outing of the year throughout this issue. See you in Owatonna for the scholarship scramble on July 14.

Congratulations to Butch and Beth Greeninger on the birth of their daughter Kelly on June 13. Also congrats to our president Fred and first lady Amy; they are expecting their first in November. And as long as we're at it, congratulations to Par Aide's Jeff Langevin and his wife Laura on their nine pound baby boy born on June 8.

Even though the news media has put the '97 floods on the back shelf, we all need to realize that the rebuilding process will take time. Help is still needed by businesses and individuals in the flood regions. If you or your course can offer any kind of assistance, please call our association office.

Don't forget to mark your calendars for the MTGF Expo on August 6 & 7. I have attended the last several years and enjoyed the event. It is held at Resurrection Cemetery in Mendota Heights and runs from 9:00 a.m. — 2:30 p.m..

Please send me your thoughts about a topic or project at your course. Some ideas might include tournament preparations, landscaping difficult areas, maintenance shop layouts and ideas, computerizing your records. The list of topics could go on and on. If you see an interesting article that you think our members would enjoy, get me a copy and the source for permission to reprint. We are always in need of material; your help would be greatly appreciated, thanks!!

President's Column—

(Continued from Page 3)

framework of our positions, how do they rank against other areas of knowledge and skill that we might possess? In other words, is knowing what color tie to wear at the club's spring social more important than knowing which nitrogen source responds best on your fairways? OF COURSE NOT! I like to think of our jobs as a refined racing engine, and image as the oil that keeps our engine lubricated. With the right amount of good oil, our engine is strong and powerful. But take away our good image (oil), and friction creates heat that eventually destroys the engine. All that is left is a pile of melted pistons in the middle of the race track.

Image, you see, is not substantive, but a thin coating that surrounds things of substance. By itself, image is only so much candy coating on an M & M; only so much snot on a doorknob. It's a thin coat of polish on an old pair of shoes. It seems to me that developing a good image, then, is secondary to knowing what we're doing on the golf course. After all, there is no sense in putting a fresh coat of paint on a broken down fence. Our challenge is to first know that fundamentals of turf and golf course management, then to use them wisely, and finally to polish and refine ourselves in order to gain the respect that we so desire and deserve.

Where Success is Never an Accident

Specialists in Soil and Plant Nutrition
Tailored to Golf Courses and Sports Turf

Services Provided:

- Complete inventory of the soils on the course or job site.
- Sampling, analyzing, delivery and interpretation of the results to eliminate guesswork.
- Help find corrective fertilizer materials to save money.
- Physical analysis on sand-soil-peat to determine proper mixing for greens and topdressing.
- Fast turn around time, yet quality is never compromised.
