

Physical Soil Testing Laboratories

The following laboratories are accredited by the American Association for Laboratory Accreditation (A2LA), having demonstrated ongoing competency in testing materials specified in the USGA's Recommendations for Putting Green Construction. The USGA recommends that only A2LA-accredited laboratories be used for testing and analyzing materials for building greens according to our guidelines.

Earn Certification Credits at Home

If you can't make it to a regional seminar, let education opportunities come to you through GCSAA's correspondence courses.

GCSAA offers seven correspondence courses that allow members to add to their continuing education credit records from the convenience of their homes.

The courses offered include "Emergency Planning and Community Right to Know," "Hazard Communication," "Media Relations," "Personal Protective Equipment for Pesticide Applicators," "Personal Stress Management," "Time Management" and "Underground Storage Tank Monitoring and Record

Keeping."

The Professional Development Catalog or the GCSAA Web site offer complete course descriptions. Correspondence courses allow students to gain from 0.7 to 1.4 continuing education units toward certification or recertification as a certified golf course superintendent. Four of the seven correspondence courses also fulfill requirements for the Environmental Management Program specializations.

To purchase a correspondence course, contact the distribution center at 1-800-974-2722. Each course costs \$100 for GCSAA members and \$150 for non-members.
