PENN G-2 Creeping Bentgrass

*What makes it so different
is what makes it so good*

The list of what makes PENN G-2 so different and so good goes on and on. Moderate fertility, heat tolerance, disease resistance and reduced *Poa annua* invasion are just a few of the highlights. What it all comes down to is simple. Whether you are building, renovating or interseeding, PENN G-2 is your grass. Why? Because it's as good as it is different.
