

Noernet Begins 10th Year

By Tom Schwab, O.J. Noer Turfgrass Research and Education Facility
University of Wisconsin-Madison

April 2008 marks the 10th anniversary of Noernet serving the turf industry of Wisconsin. Where have the years gone? For those unfamiliar with Noernet, it is an automated electronic list that serves as an "email discussion group" for turf professionals. Subscribers share information that helps them in their work. Discussions have included landscape construction projects, turfgrass selection, pest alerts, solutions to pest problems, equipment or tool choices, sale of used equipment, educational event announcements, university research results, government regulations, management solutions and other topics.

The way it works is any subscriber may write a turfgrass management related question, concern or comment to the Noernet email address. All subscribers will receive that message and may send a reply back if they choose. Everyone will see that reply and again have the option to respond with additional information.

Some subscribers are extremely active and respond to many messages. Others never write messages and only read Noernet to keep an eye on what is happening around the region. You may participate as much or as little as you like. There are also many topics discussed across professions. For instance, a sports field manager or sod producer may ask questions to lawn care providers and golf course superintendents, and vice versa. We all belong to one important industry that is being brought closer together by sharing information.

Noernet presently has 170 subscribers from golf courses, sod farms, sports fields, lawn care companies and turf businesses. Most are from Wisconsin, while others come from Michigan's Upper Peninsula, eastern Minnesota and northern Illinois. Several Minnesota superintendents have inquired about expanding Noernet to all of Minnesota. Soon there may be many more turf professionals from which to

gather expertise.

Noernet is meant for local use and concerns. There are many national discussion groups but Noernet is intended for turf care professionals in Wisconsin and neighboring states. We are better able to discuss topics unique to our Upper Midwest region by keeping it local. Noernet is also a private list. It is not meant for homeowners, media or any individuals outside of the turf profession.

If you think that sharing of information is an important tool for turf management, then Noernet is one more tool available to you. Let your peers know about this service if you feel they could benefit. Instructions for subscribing and participating in Noernet are written below.

The University of Wisconsin-Madison sponsors this electronic discussion group. They have set an appropriate use policy which includes:

(Continued on Page 11)

LEITNER COMPANY

Specializing in Soils for Golf Course Maintenance & Construction

Soil mixing and processing specialists.

Supplying the Golf Course Industry with soil and sand products for over 60 years.

Material to specification for topdressing and construction.

Quality - Reliability - Experience

MIKE LEITNER
LEITNER COMPANY

945 Randolph Avenue ~ St. Paul, Minnesota 55102

(651) 291-2655

PROUD SUPPORTER OF RESEARCH AND EDUCATION THROUGH THE MGCSA

You may not use Noernet for uses that are forbidden by the University of Wisconsin campus telephone or paper mail system;

Noernet is not to be used for personal purposes or gain;

Do not send abusive, vulgar, harassing or bigoted messages;

It is the policy of the University of Wisconsin-Madison Board of Regents that Noernet be used primarily for purposes of fulfilling the University's mission of teaching, research and public service, and

Content of all postings are that of the contributing author and not necessarily of the Noernet list owner, moderator or of the University of Wisconsin-Madison, Division of Information Technology.

How to Subscribe to Noernet

1) Log onto the Noernet web address: https://lists.wisc.edu/read/all_forums/subscribe?name=noernet using Netscape,

Internet Explorer or a similar web browser.

2) This takes you to the WiscList page where you type your email address and name in the blanks provided. You may also enter a password but that is optional. You do not need a password, so enter one only if you really want one. If you forget your password, you can find it again through the website.

3) Next hit the subscribe button.

4) It may take a day before I can post your name to the list after you sign up -- so be patient.

5) You may email or call me if you have any questions or problems with Noernet at tgschwab@wisc.edu or 608-845-6895.

How to Participate in Noernet

1) The easiest way to participate in Noernet is to send an email to Noernet@lists.wisc.edu, just like you normally send emails. You will receive all Noernet messages at the email address that you used to subscribe.

2) Remember that if you reply back to a message, all subscribers will see your

response. If you want to send a personal reply, just to one person, then cut and paste their email address from the Noernet message into a separate email. But active participation of subscribers is what Noernet is all about as long as messages are thoughtful, productive and follow the rules outlined above.

3) Another nice feature of Noernet is you are able to look at the past 180 days of messages. Follow the instructions in #4 to open the archive page.

4) The other way to participate in Noernet is from the web address: <https://lists.wisc.edu/read/login/?go=https://lists.wisc.edu/read/?forum%3Dnoernet>. Type this address into your browser. This will take you to the WiscList page where it'll ask for your email address. Another box will ask for your password, but most of you don't have passwords, so next click the OK button to open the Noernet page. That page shows 180 days of archived Noernet messages, and also has a 'Create New Message' button for sending messages. Always remember to write a topic in the subject area when you send a new message.

Whether your course is under constant water use restrictions or you have plenty of water available, the real challenge is getting water to go where you need it. The amount of water you apply doesn't matter if your turf can't access it.

Dispatch increases the penetration and infiltration of irrigation or rainfall, making it more readily available for plant uptake. Because Dispatch delivers water more efficiently into the soil, photosynthesis

and other turf metabolic functions can be maintained with less water. The result is increased turf performance even under heat and moisture stress, and more dependable plant growth.

For those who cannot or choose not to inject, we now offer a sprayable formulation so that you may enjoy the benefits of this unique, patented, water saving chemistry.

Aquatrols offers two pump options for injecting Dispatch Injectable. The Neptune Pumps are available through your turf product distributors.

- ▶ Reduced water lost to runoff and evaporation
- ▶ improved irrigation efficiency and reduced water usage
- ▶ Better turf performance and playability

All Aquatrols products are available at these Tessman locations—
