

COUNTRY CLUB TURF PRODUCTS

The finest you can buy today!

COUNTRY CLUB HAS A COMPLETE FERTILIZER LINE!

Based on specific requirements two or more of these products will work efficiently to complete your entire fertilizer needs. Increase your nutrient efficiency by using a balanced fertilizer to solve your fertility problems.

COUNTRY CLUB HAS A FULL LINE OF CONTROL PRODUCTS!

Chemicals in combination with fertilizers only where fertilizer and chemicals compliment each other — otherwise control products are on an inert base.

EACH PELLET IS A CHEMICALLY COMBINED HOMOGENEOUS GRANULE!

An individual granule contains the same ingredients as the analysis on the bag — thus better nutrient uptake by plants.

COUNTRY CLUB FERTILIZERS ARE DUST FREE!

Our quality control assures you of granules sized for a specific need and are free of fines and oversized granules.

COUNTRY CLUB FERTILIZERS GIVE EXCELLENT COLOR AND HOLD IT!

Our fertilizers contain the right amount of soluble and insoluble nitrogen to allow immediate green-up and provide long term greening — with a minimum number of applications and without excessive mowing.

EACH GRANULE IS A COMPLETE BALANCED FEEDING UNIT!

All formulas are agronomically balanced to meet a specific turf need in this area.

COUNTRY CLUB PRODUCTS CONTAIN ONLY THE ESSENTIAL NUTRIENTS!

The top of the line products have more WIN, higher organic content, more sulfates, and are supplemented with important secondary and micro nutrients. Note — The nutrients in Country Club products have been proven by research to be needed by turf.

SIZING MAKES THE DIFFERENCE!

The greens grades are full weight small granules that readily drop to the soil surface — thus less pick-up by greens mowers. The fairway sizing is larger to permit full distribution and even coverage.
