

DR. WATSON HONORED

Dr. James Watson, vice-president of customer relations and agronomist for The Toro Company, Minneapolis, Minnesota, has been named 1986 Man of the Year by both LANDSCAPE AND IRRIGATION and WEEDS, TREES, AND TURF magazines.

Watson, 66, is one of the nation's leading figures in the development of the turf-grass industry. He was the first person in the country to receive a Ph.D. in turf-grass science, which he earned in 1950 at Penn State University. Since then, Watson has been one of the industry's leading proponents of the need to research water conservation and turf management.

Since joining Toro in 1952, Watson has been part of the company's product development team. "He has been a real source of innovation", said Ken Melrose, president of the Toro Company. "Having an agronomist advising us on trends has given us a great advantage. He is very much

involved in product development, distributor relations and customer service."

Watson is a "fellow" in the American Society of Agronomy and the Crop Science Society, and is currently an Adjunct Professor in the Department of Horticulture and Landscape Architecture for the University of Minnesota.

Dr. James Watson receives the 1986 Man of the Year Award from Denne Goldstein, publisher of LANDSCAPE AND IRRIGATION magazine.

Outgrow your *Poa annua* problems with ProTurf

Now, with Scotts new TGR™ technology, you can reduce your course's *Poa* population, while encouraging more desirable grasses. You'll see a gradual, more natural transition to greener, denser turf without a sudden decrease in playing surface quality.

Ask your Tech Rep for full details.

Stroke for stroke, the best in the business.

Greens King® IV Diesel.

Now, you can approach the green with the finest tournament-quality triplex greens mower and cut your fuel costs virtually in half. Because the innovative Jacobsen Greens King family introduces another industry first: *Diesel*.

The new 16½-hp. diesel Greens King IV provides more power for climbing and cutting. Plus, this diesel model has many standard features you'll only find as options elsewhere. Like full floating and pivoting reel units that steer through turns without scuffing or marking; full hydraulic drive with dynamic braking for greater control: just let up on the pedal to slow down; and, variable speed control which allows the operator to select the precise ground speed and frequency of cut for greens while still allowing full speed for transport.

By cutting horizontal runners and removing thatch, the patented Turf Groomer™ attachment creates faster, truer and healthier greens *without* lowering height of cut.

If you prefer a gas engine, both 14-hp. and 16-hp. models are available. Giving you the broadest selection of riding greens mowers in the industry. With more options, to help you meet your greens care needs more precisely.

Like the revolutionary, patented Turf Groomer™ attachment for faster, truer greens. *Without* lowering height of cut.

And, the unique *performance monitor* which digitally displays all speeds, including cutting frequency, so the operator can evaluate mowing performance, instantly.

What's more, every Greens King is backed by the most extensive support network in the industry. So, contact your Jacobsen distributor to arrange a free demonstration. And see for yourself why the Greens King family is the best in the business.
