# HOLE NOTES

## THREE POWERFUL WAYS TO DEFEND YOUR TURF.

Kawasaki's Mule™ utility vehicles attack turf work in a powerful way. With performance features like torquey engines, dual-mode differentials, advanced suspension, and 1,000+ pound total payloads. The 2020 is designed for turf care, with tilting flat bed, turf tires, and more. The 1010 really pulls for you with 4-wheel drive. The 2-wheel drive 1000 works like a champ, too. So if you want a better way to defend your turf, put a Mule on the job.

© 1990 Kawasaki Motors Corp., U.S.A.  
 The Mule is an off-highway vehicle only.  
 Built in Lincoln, Nebraska

Let the good times roll.
