

NOW GROW TOUGHER TURF FOR FEWER BUCKS.

Introducing Masters' Brand Controlled-Release Potassium Fertilizers.

Masters' Brand is the surest way to give your turf all the potassium it needs without risking turf burn or too much nitrogen stimulation.

The results of tests by a leading turfgrass scientist show a 44% higher K retention rate for Masters' Brand treated soil. And 114% more potassium in plant tissue.

Our 9-0-27 and 0-0-39 fertilizers save you money in the long run, too. With less leaching, you get optimum performance using less product. And, since fewer applications are required, you save on labor costs.

Grow great turf for less this season.

Get all the details on Masters' Brand Controlled-Release Potassium Fertilizers and our other Masters' Brand

fertilizers and seed products. Call Turf Management Products at 612-476-1650 or contact:

EDITOR'S CORNER

By Bill Johnson
Edina Country Club

As has been mentioned by previous editors, gathering articles from fellow superintendents is a most difficult task.

While we did not have as many superintendents writing articles this past year as desired, I want to thank those of you who did take the time to produce stories, some with photographs. They were all interesting and informative.

I want to urge, once more, for all of you to consider writing an article for *Hole Notes*. Your stories will help to make future issues even better. If you have an idea for an article, but want help in writing it, just contact the MGCSA office, and they will assist you.

In my opinion, the change in publisher in 1990 has been good for all concerned. The MGA office staff did an outstanding job for us for years, and we thank them. However, with the continued growth of both organizations, it was agreed that we should seek a new publisher.

We are very fortunate indeed to have acquired the services of Turtinen Communications to publish *Hole Notes*, as well as to conduct the business affairs of our association. With their fresh and enthusiastic approach, I am confident that *Hole Notes* is in good hands, and will continue to improve.

* * * *

On the other hand, readership of *Hole Notes* obviously is excellent. This was most evident following publication of the October edition.

In that issue we carried a notice to call the MGCSA office if readers hadn't received their pre-registration material for the November 28-30 MGCSA Conference and Business Meeting at the Northland Inn in Brooklyn Park by the time they received *Hole Notes*.

Well, it appears that final information for the program was delayed a tad, and the pre-registration material wasn't mailed until early October.

In the interim, the MGCSA office was bombarded with calls, with readers noting the story and reporting that they had not received the pre-registration information. Shortly thereafter, they did. Despite the numerous phone calls, the *Hole Notes* staff did take delight in the fact that the information published was being read.

Now, wouldn't it be nice if we received such a flurry of calls with story ideas?

—Bill Johnson, Editor

Convention Registration Reminder

When registering for the 1990 MGCSA Turf Conference and Business Meeting, be sure to write your pesticide number on your registration form. Thank You.

Sometimes Water Can Be a Problem...

Unless you let TORO Irrigation
Systems work for you.

We will custom design a complete system
to fit your irrigation objectives. Our full
time, experienced staff answers all of your
irrigation questions

We want you to get a head.

A TORO Low-Pressure Sprinkler Head

LEASE IT ...

THREE MONEY SAVING TIPS...

1. Use Toro Low
Pressure Heads to
save energy and
dollars.

2. Ask your power
company for
off-peak electric
rates for
irrigation.

3. Don't buy an
irrigation system...
LEASE IT... Ask us
why it makes sense.
