

# GreensCare

## Biodegradable Hydraulic Fluid

**Jacobsen GreensCare Biodegradable Hydraulic Fluid**, carefully tested by Jacobsen/Texttron engineering, is **the only biodegradable hydraulic fluid approved for Jacobsen equipment**. All Jacobsen/Texttron warranties are protected with this product.

Sure, these products cost a little more initially than petroleum-based oils, but biodegradable products offer peace of mind to golf course superintendents and grounds maintenance managers.

The advantages of Jacobsen's GreensCare products are simple:

1. In case of a fluid spill, *no adverse or long-term effects to turf* will occur. Biodegradable oils break down quickly when exposed to air, water and microbes allowing turf to quickly recover.
2. Damage is limited to discoloration of turf caused by excessive heat. *Turf will recover in days* when water is applied immediately to spill.
