**To the Aercore 800, this might as well be the flattest green on earth.**

It's all the same to us. Because whether a green has a severe slope, rolls a little bit, or has no roll at all, our Aercore™ 800 Walk-Behind Aerator can produce an even depth of coring on all of them. Unlike some walk-behind aerators that position the coring heads behind the wheels, the Aercore 800 has its coring head between the wheels. This allows the coring head to stay at a consistent level to the ground

And produces the same length of plug, again and again.

The benefits of the Aercore 800 keep rolling. A new hydraulic lift lower system greatly improves entry and exit hole quality. And standard tire core deflectors easily displace cores in front of the drive tires.

To see how the Aercore 800 can give all of your greens uniform aeration, call your John Deere One Source distributor.
