

JACOBSEN
A Textron Company

- Energy and Economics - Features a hybrid or battery powered system that is simpler, faster and less expensive to operate and maintain.
- Comfort and Confidence - Maximize your operators potential with an ergonomic design that keeps controls comfortably within reach and the view unobstructed.
- Versatility and Value - Numerous attachments available including the Turf Groomer®, Quick Roll™ attachment and a variety of rollers for the best playing conditions.
- Tradition and Trust - Uses Jacobsen Classic XP reels, trusted for the highest quality-of-cut at the top courses around the world.
- Respectful and Responsible - No hydraulic oil to leak or change coupled with significantly reduced noise and exhaust emissions make the Eclipse 322 an environmental champion.

- The ONLY walking greens mowers with variable frequency of cut - for the finest quality cut in any conditions.
- The ONLY walking greens mowers with onboard backlapping - to quickly and easily maintain a superior quality of cut.
- The ONLY walking greens mower with a fully isolation-mounted engine, which dramatically reduces operator fatigue and excess vibration on the turf, resulting in a better, more consistent cut - day in and day out.
- The ONLY walking greens mowers available in hybrid or battery drive, providing power, economy and low environmental impact.
- ONLY the Eclipse™ allows for quick and easy reel removal - simply pull three pins, unhook the crossbar and unplug the electrical motor connection. This allows operators to easily mow two different heights of cut with one machine.
