

Host Bob Shields. Ladies will be welcome to attend this meeting.

November 10 - Burning Tree C.C. Host, Richard Anderson. Meal and business meeting will be held elsewhere. Place will be announced.

December 9 - Indian Spring C.C. Host, Ed Dembnicki. This will be our annual election meeting.

ERROR AND APOLOGY

Through bad proofing and failure to pay attention, last month's meeting place was listed incorrectly. Apologies for this editorial error are in order for Bob Martino, super at Island View G.C. where the picnic was really held. The annual family outing turned out to be a famous success and everyone thoroughly enjoyed themselves.

ROSES TO -

Bob Miller, for getting mentioned in the June issue of the Golf Superintendent. Bob has a unique and inexpensive spray booth made in his shop which was worthy of mention in the "Thinking Superintendent" column. There are many supers in our own are who are surely doing things in their own operation which bear mentioning. Be thinking about them and even if you don't think they are good enough to be "National" material, send them to the local and we'll put them in here. Let's start our own "brain column."

ACCIDENTS CAN HAPPEN - BE PREPARED

The title and the following two articles are from the May issue of The Golf Journal and contain information we should all be more familiar with. They deal with first aid on the golf course when accidents occur. It might be wise to read these two or three times and commit some if not all the information to memory.

PROBLEM - STRUCK BY GOLF BALL

People are often struck by golf balls. If a person is struck on the head there is reason to suspect serious head injury, even perhaps a fractured skull.

First, keep the victim as quiet as possible. There is no need to determine if a fracture is present; the possible injury to the brain is more important.

The presence of swelling, or perhaps a wound on the head are important clues. Occasionally the pupils of the eyes will be unequal in size. Also, bleeding from the ear canal, the nose, or the mouth sometimes indicates head injury. The amount of blood is of little consequence; there could be only a few drops but even so it is an indication of brain injury.

One or more of the extremities may show evidence of paralysis; the face may be pale, flushed, or normal in color. The pulse may be slow and full, fast and weak, or normal.
