Pure Live Seed

As everyone knows, grass seed varies not only in price but in quality as well. What everyone doesn't know is that quality seed usually does not cost as much as the "bargain" or low priced seed lots. Spiraling seed costs necessitate our having to individually evaluate all planned seed purchases for Pure Live Seed. Fortunately, this takes very little time and effort.

State and Federal laws require that certain information be on each seed container. The pure live seed is figured from this label. Take the percent pure seed and multiply it by the percent germination to obtain the percentage of pure live seed. This pure live seed is that you can reasonably expect to germinate, and should be your basic guideline for comparing different seed lots for price per pound.
