

informed and educated people and they have a new found respect for a Golf Course Superintendent. What better way to help yourself and fellow superintendents better their image?

Public Speaking is not for everyone, but you'll never know if its for you if you don't try it. It is time well spent.

Wayne Evans

## Correspondence

January 8, 1976

Mr. Robert Orazi  
16 Canterbury Lane  
Fallston, Md. 21047

Dear Bob:

Frances and I thoroughly enjoyed the evening with the Mid-Atlantic group. Thank you for the courtesies shown us. The complimentary dinner was unexpected but pleasurable.

I am proud to be a member of Mid-Atlantic! It was 1931 when I started working with the group. O.B. Fitts, Tom Ryan and Bob Scott were among the top men then. Crabgrass control was the big push. I got a leg up on it on the U of M campus with sodium arsenite (now a no-no) for my master's degree in 1933. That was in the days of the depression.

The Mid-Atlantic superintendents have to take some sort of prize for appearance, for no-nonsense delivery of papers and for excellent conduct of meetings. I'm just as glad I am one of you!

My very best wishes for a successful 1976 season devoid of Fusarium, Poa annua and dung beetle.

Sincerely yours,  
For Better Turf,

Fred V. Grau

## KENTUCKY BLUEGRASS<sup>®</sup>

\*U.S. Plant Patent #3186, Dwarf Variety

### A professional grass for professional people

One reason Baron is the choice of most professionals is the combination of fast germination, slow growing and its ability to quickly form what sod growers call "a tight-fisted root system." You can mow Baron as low as 1/4-inch — and that's another reason Baron is ideally suited for golf courses, sod fields, fine lawns, industrial and other landscaping areas. Since Baron is winter hardy, it keeps its deep green color well into the cold months. . .highly disease-resistant, too.
