Long, Long, Ago...

Greg Bayor

• **15 yrs. Feb./Mar. 1963...**

Northwest Regional Park's 18 hole public golf course is under construction, at a cost of \$195,000!

Island View Golf Course is seeking a Superintendent... starting salary: \$7,000.

"There is serious talk of permanently locating the National office in the Jacksonville area." by L. Robert Shields

• **10 yrs. Feb./Mar. 1968...**

George Cleaver became president of the Mid-Atlantic.

The March meeting was held at the Green Spring Valley Hunt Club; the host is pictured here?

• **5 yrs. Feb./Mar. 1973...**

George Cleaver was elected as Director of GCSAA at the Boston conference. (Seems like 5 year cycles for George!)

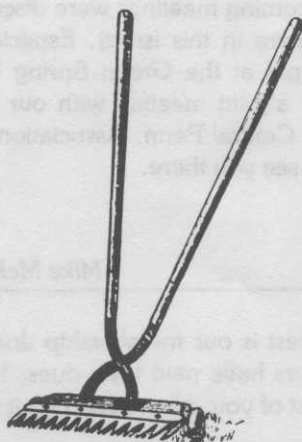

Angelo Cammarota and Bill Livingston received their 25 year pins at Boston. Also receiving 25 year pins from GCSAA were Dr. Fred Grau and George Cornell. George is the first commercial member ever to receive the award. According to George "he joined when he was 16 years old."

GREEN'S PATENT GRASS EDGE CLIPPER

Size and Price, 7 inches wide, 7 ins. diam., £1 16s. Packing Case, 3s.

Specially designed to meet a want which has long been felt in cutting the overhanging grass on the edges of walks, borders, flower-beds, &c., and do away with the tedious operation of cutting with shears.

It's A very useful and serviceable Machine.

NEW PATENT GRASS-CUTTERS

(PATRONISED BY THE BOARD OF WORKS).

W. CLARK, 232, Oxford Street, London, W.,

Begets to call public attention to a Patent Grass-Cutter he has just invented for use in the Garden and Farm, based upon the principle of the well-known "Clark's" Horse-clipping Machine, and which is, by its lightness of construction and rapidity of action, far preferable to the existing implements in use, and supplies a want long felt by every one who possesses a garden, namely, an instrument which will mow grass where inaccessible to the lawn mower, trim grass plot edges, clip Ivy and other creepers, also shrubs and trees, and keep in order Box borders and fancy Trees, &c.; all which this ingenious little instrument is capable of doing.

It is made in three sizes, to cut in breadth 8 inches, 12 inches, and 16 inches respectively; and is so easy in working, and at the same time so effective, that even ladies can work it without feeling fatigued, there being no occasion to stoop on account of the long wooden handles attached to the machine, and a greater quantity of work can be done in a given time than by any other method.

This invention is also applicable for Farm purposes—Reaping Corn and other Crops, Clover, Rye, &c., equally as well as accomplishing the objects for which it is required in the garden; and the cost being so small in proportion to the saving in time and quality of finish effected, it is placed within the reach of all, and needs but a trial to prove its superiority.

PRICES.

The 8 inch Machine, complete with Rollers and Tray	21s.
Ditto, without Rollers and Tray	18s.
The 12 inch Machine, complete with Rollers and Tray	28s.
Ditto, without Rollers and Tray	24s.
The 16-inch Machine, complete with Rollers and Tray	38s.
Ditto, without Rollers and Tray	33s.

To be obtained of all Ironmongers, Horticultural and Agricultural Implement Manufacturers throughout the Kingdom, and of the Patentee.

W. CLARK, 232, OXFORD STREET, LONDON, W.
