Golf Course Superintendent through Education and Merit

Volume XXXIII

January 1980

Number 1

President's Message

It is indeed an honor to have been elected President of the Mid-Atlantic. I would like to thank the membership for their support and confidence. You have elected an excellent Board of Governors and I am looking forward to serving with them.

The Mid-Atlantic has a reputation of being the finest chapter in the nation and I pledge to do everything in my power to uphold it.

Well, here it is the beginning of a new year; a time for everyone to start breaking all of those New Year's resolutions and a time for us to regroup; evaluate and plan for our new golf season just ahead.

Respectively,

Ron

Past President's Message

It was a pleasure and an honor to serve as President of the Mid-Atlantic Association of Golf Course Superintendents.

I want to thank the membership for electing me and for your support throughout my term.

The upswing in attendance and the quality of the meetings will be beneficial to the Association.

I again would like to thank the Board of Directors for its' hard work and support. A good working Board is what makes a good term.

Thank you,
Sam Kessel

Editorial – Safety

G. Bayor

Mr. L. Rudinski's safety notice, located in this issue, stimulated me into some thoughts I believe all of us should consider. My job as District Superintendent of Parks makes me responsible for 109 employees, which makes my odds for job related accidents pretty high. This year I've had 20 accidents (down 8 from last year) comprising items such as: frostbite, back strains, debris in the eyes, twisted appendages, cut fingers, hand, feet, bruised ribs, heat exhaustion and bee stings. Some of these items might be considered minor, but when you figure it represents a little under 20% of my work force, it indicates that my employees stand a 1 in 5 chance of having an accident. Prevention is the ONLY way to avoid situations that could be costly to both the employee and employer.

How many of you could honestly answer that your safety standards simply include a word of caution and a reliance on the club to provide health insurance. What would be the answer to these questions:

1. Do you or any of your employees hold a Red Cross First Aid Certificate?
2. Do you or any of your employees have cardiopulmonary resuscitation (CPR) knowledge?
3. Do you have any organized safety meetings or discussions?
4. How safe is your grounds equipment?
 - a. Are all of the original guards in place?
 - b. Does your mechanic regularly inspect your equipment for defects/damage, which may be injurious to an employee?
 - c. Do you give PROPER operating instructions to employees?
5. How safe are your buildings?
 - a. Are your fire extinguishers charged and highly visible?
 - b. Are your exits properly marked?
 - c. Does all of your shop equipment (drills, grinders etc.) meet proper OSHA standards?
 - d. Do you have adequate employee clean-up facilities — especially eye wash and showers for chemical applicators?
 - e. Do you provide safe storage for chemicals, supplies and equipment?
6. Do your employees wear proper safety apparel dictated by the job they're doing, or do they wear items more suitable to the prevailing temperature?
7. Do you have a ready list of emergency phone numbers immediately available to your phone?

The answers to these questions do vary according to needs, but I believe all of us should exhibit a desire to provide some protection to the above questions.

1. **First Aid Classes** — Organize one; get in touch with your local Red Cross. If there's a cost involved, won't it be less to the club than a serious accident?
2. **CPR** — is important not only for your employee but also for your golfers playing your course. Again, contact the Red Cross, it's not difficult to learn and it just might *save a life*.
3. **Safety Meetings** — An hour or two once a month for safety discussions could save many lost hours of an injured employee. Get your employees involved to help themselves. What they learn at work will carry over to their home life where it might some day prove invaluable.
4. **Grounds Equipment** — The factory installed safety guards are there for a reason — KEEP them on. I've had to add *extra* guards on some of my mowers due to recent injuries. Keep on top of your equipment. Have your mechanic take responsibility for the equipment's proper operation, regardless of how often employees abuse certain pieces. Also remember that even though employees sometimes are very familiar with a piece of equipment, they do at times forget the proper operating procedure. Take the time to occasionally review procedures before you see unsafe operation. And especially take the time to indoctrinate new employees to safe operating methods.
5. **Buildings** — Every year, somewhere in the US, a golf course maintenance building burns down; can you go for a couple of months without equipment or a few pieces of borrowed equipment? If your building should catch fire, do your employees have alternate means of escape? Make sure all exits and windows are operable and visually available. Check your fire extinguishers. If you haven't experienced an OSHA site visit, then count yourself lucky because more than likely your shop machinery is in violation. Take a small amount of time and really review these pieces. Make sure that your hygiene facilities are up to par: some clubs are installing eyewashes to supplement their sinks and showers, which is definitely a good idea. And lastly, make sure you have proper storage for dangerous items: chemical room with proper shelving, ventilation, lighting and storage procedures; proper safety gas cans, not empty Clorox bottles; specifically designed measuring vials, not coffee cups; and don't forget

(continued on page 3)

Miscellaneous Items

G. Bayor

The new Toro distributor will be TURF EQUIPMENT & SUPPLY, located at 6660 Santa Barbara Road, Elkridge, Md. 21227, phone number 796-5575. Mr. Jim Manty is the owner.

A couple of items worth noting from CORNELL CHEMICAL & EQUIPMENT CO., INC.:

Roundup (Monsanto) Herbicide — For those who have not used Roundup but would like to try a little, Roundup will be available in quarts in 1980. (about \$20.00/qt.)

RP-26019 (Rhone Poulenc) Fungicide — Now Chipco 26019. Fully labeled for use on turf. During 1979, first year of use, results were outstanding, even though the year was exceptionally wet.

Anyone interested in equipment trades — I need an old topdresser; I'm willing to trade a 1968 76" Professional

(Toro) in running order or a 1973 Ryan Ren-O-Thin in good shape or a 1971 Devere 31 Rotary Mower (similar to walk behind Gravely). Call me at 396-6101.

Merrill Frank at Baltimore CC has just installed a new irrigation system and now has plenty of extra hose and walking sprinklers that he'd be interested in selling or trading. Interested parties should call 252-0110.

Ken Braun at Bonnie View CC would be interested in trading 40 gallons of Caddy (5 gal cans) and 10 gallons of Methar 30 for other chemicals. Ken's number is 486-2054.

Any time anyone has anything to sell or trade, be sure to use your newsletter. I recently made a trade with Gary Phillips, Chartwell Golf & CC, which I'm sure both of us feel that we made a good deal. Find something you're not using anymore and may be you'll be surprised to find someone who needs it.

Editorial *(continued from page 2)*

an Underwriters' approved rag-can to prevent that ideal starting point for fires.

6. **Proper Apparel** — Too many employees, especially summer help, like to wear the least amount of clothing while working. Encourage proper apparel if not demand it. Safety hats, goggles, gloves, steel toed shoes, long sleeves, long pants, respirators, all have the proper place and time; it's up to the supervisor to make the best use of this equipment.

7. **Emergency Phone Numbers** — This is a very simple item that I'd hazard a guess that most golf courses don't have next to their phones. Take 5 minutes and make one up: it may save 15 minutes towards some emergency.

Perhaps much of this will be things you already do and that's something to be proud of. Participation in proper safety measures makes all the difference in what the outcome will be when an accident/emergency occurs. The one thing you can be sure of: sooner or later you WILL have an accident/emergency, the "later" depends entirely on you.

- Sterilized Top Dressing
- Shredded Tan Bark Mix
- Peat Humus
- Top Soil

EGYPT FARMS EXCLUSIVE! All top dressing ingredients are thoroughly mixed and sterilized by indirect heat in our special process. The sand particles are actually coated with a mixture of top soil & peat humus for a completely homogenous mixture that will not separate during handling and spreading.

Egypt Farms top dressing is formulated especially for the transition zone to specifications recommended by the United States Golf Association, Texas A&M, Penn State, North Carolina, and the University of Maryland.

Many years of research and testing by these leading universities have produced a soil mixture for superior growth; to maintain the best balance of percolation; to resist compaction; for good aeration; and for the retention of usable water & nutrients in the growing medium.

*Green and tee construction materials and mixes conforming to U.S.G.A. specs are also available.

Diamond Shamrock

Everything you need to control diseases and weeds in turf and ornamentals.

Ten turf diseases and almost 100 kinds of weeds yield to the Diamond Shamrock Pro-4 turf system. One broad-spectrum fungicide. One preemergence herbicide. One postemergence broadleaf herbicide. One postemergence grassy weed herbicide. That's Diamond Shamrock Pro-4.

DACONIL 2787® . The new chemistry fungicide. And now it's a flowable, as well as a wettable powder.

DECTHAL® preemergence herbicide controls *Poa annua*, crabgrass and 15 other weeds. Available in two formulations: wettable powder and granules.

DACAMINE® postemergence herbicide. Non-volatile 2,4-D. Kills more than 70 broadleaf weeds.

DACONATE® 6 postemergence herbicide. The organic arsonate with a high-quality surfactant already mixed in.

Safety Tip

L. Rudinski

A recent safety bulletin came by my desk that I believe serious enough for everyone to make safeguards against this possible hazard.

"In the last 30 days, the Union Pacific Railroad has had two fatal accidents caused by butane lighters. These accidents occurred in welding areas when an employee was welding with a butane lighter in his pocket. A *spark* from the welder landed on the butane lighter, burned through, exposing the fluid in the lighter which exploded. One lighter was in a shirt pocket and killed the individual instantly; the other lighter was in the pants pocket and caused an amputation. The man later died. **There is the same amount of force in a butane lighter when it explodes as there is in approximately three sticks of dynamite.**

Please inform everyone in welding areas that they should not carry disposable butane lighters on their body during welding or even when in the area.

Welding or cutting takes place in almost everyone of our plants. Make sure all personnel in your plants understand the danger of this situation.
