

Prograss, from page 4

variable from fairway to fairway. For example, we observed on our Penncross research green (3/16" mowing, sunny, excellent rooting, no traffic, etc.) that Prograss at rates as high as 1.0 lb ai/A only mildly discolored bentgrass. At Port America, 0.5 lb ai/A caused severe injury to bentgrass grown on a wet, shaded green. I don't believe liquid formulations of Prograss will be labeled for use on greens in the foreseeable future. O.M. Scott, however, is attempting to label a granular formulation for use on greens and fairways. There will be limitations placed on using the granular product and registration is not expected until 1995.

GOLF NOTES
