

operators' training video. Once the operator has been properly trained, you should insist on safe and orderly operation of the equipment.

✓ **Using the equipment in the proper place—that is the place for which it was designed.** Manufacturers design equipment to perform a specific task or operation. Be sure your operators know the capabilities and limitations of the equipment.

All three factors are interrelated. If one of the above is ignored, the potential for an accident exists. Always follow proper safety practices and procedures. Make safety your most important consideration. Make your golf course a safe place to work and play.

### Get out of that cart!

Research by the New Hampshire Heart Institute has revealed that walking the golf course three times a week will lower total cholesterol, raise the level of high-density, lipo-protein cholesterol—the good kind—in the blood and reduce the risk of coronary heart disease.
