

New Pennsylvania Putting Green Mower

The Pennsylvania Lawn Mower Works, in announcing the new Super Putting Green Mower emphasizes its high speed and light weight. Mr. J. S. Bonbright, Sales Manager for the company, calls particular attention to "the change to methods of manufacture adopted by automotive engineers, which is well illustrated by the cut gears running in oil tight casings, lubricated by the Alemite system, and the adoption of roller and ball bearings on all the various axles and on the intermediate gear."

Mr. Bonbright further states that "the Super mower makes an 18" cut, is equipped with anti-slip aluminum rollers, and mows a putting green speedily and without ridging."

Greenkeepers are invited to send for the new Golf catalogue just issued, which describes fully the Super mower and other well known products of the Pennsylvania Lawn Mower Works.

Wear-Well Tractor Spud

A tool steel centre pin insures longest possible service and long continued traction because of the tendency of this new spud to "wear to a point" at all times.

Another feature which will be appreciated is its square shoulder, designed to save time and strength in removing and installing.

Mr. Russell S. Horner has been a golf course mechanic and assistant greenkeeper for some time, and his experience in this capacity prompted him to manufacture this small but important item for the benefit of other greenkeepers and mechanics throughout the country.
