The Clearing House

(Continued from page 12)

new growth starts until controlled. Iron sulphate causes the grass to turn black, but this is only temporary, and it will soon come up green again.

I would like a little information as to the possible value of granulated charcoal on my greens. Our soil is a very heavy black loam, drying out and baking very fast with hot dry winds, and becoming hard in a day's time.

Fargo, No. Dakota.

Look up the January number of the Greenkeeper, and read Mr. Morley's short article, "Why I Use Charcoal." Charcoal takes up water when the soil is wet, and gives it back to the soil when the soil is dryer than the charcoal. In addition to charcoal, we believe that fairly

heavy application of sand to your greens will help materially.
