

Extensive J. O. J. Line

THE exhibit of the J. Oliver Johnson Company of Chicago at the International Golf Show will be extensive, in fact will cover practically the entire list of equipment necessary for the maintenance of a course. A selection from this large number of pieces is pictured below.

Barrel Spray with Handle Shut-off

The Lewis Ball Washer

J. O. J. Drag Mat for Top Dressing Greens

ROYER COMPOST MACHINE

Cuts the time and expense of preparing top-soil, compost, etc., 75% to 85%

A Royer blending and shredding sand, soil and manure in one operation as fast as two men can shovel the material into the hopper

Do you read the newspaper, or drive an automobile, or ride in a modern steel train, or talk over the telephone?

Would you care to go back to the days when the news was broadcast by the town crier, and when traveling was done by means of the stage-coach, and when messages had to be delivered cross country on horseback?

If not, why not modernize your golf equipment. The old method of screening top dressing and compost is just as obsolete and out-of-date as the town crier or the stage coach. Investigate the Royer compost machine, and cut costs to one-half or one-sixth of your present expense. Send for latest bulletins.

THE "LARK" Golf Sprinkler

No Gears

No Repairing

It sprinkles up to 150 feet in diameter on higher pressures. Low pressure does not affect its operation except to decrease the area it covers.

It has no Gears but revolves as slowly and steadily as a geared sprinkler. The elimination of gears means the elimination of complicated wearing parts and constant repair. Its construction is so simple that there is no chance for trouble.

It is fool-proof, no amount of rough handling can hurt it. It is light in weight and easy to carry.

Perfect
Distribution

Fool-Proof

Neither wind, nor sloping hillside will stop its steady revolution.

The control of the speed of the main stream from one revolution in 30 seconds to one revolution in 3 or 4 minutes, is obtained by a slight turn of the nozzle tip at the end of the main arm.

The Lark is a labor saver for its wide covering capacity saves frequent setting. The roller base prevents any damage to greens.

It is warranted to give long service and satisfaction, by the largest manufacturer of lawn sprinklers and hose accessories in America.
